

Noise Detector

Part-No.: HN-D32N

HN-D32N Noise Detector is designed to collect ambient noise samples and transmit them to the control system. The system can then automatically adjust the volume to deliver intelligible sound. It is intended for use in areas such as metro station, airport, shopping mall, where noise level varies constantly and sound clarity is of utmost importance.

Transmission range	60 Hz ... 18000 Hz
Sensitivity	2,4 mV
Sound level	152 dB
Impedance	2000.000000000 Ω
Color	white, similar to RAL 9010
Dimensions	Ø: 200 mm D: 118 mm

Features:

- Collect ambient noise from built-in microphone
- Elegant appearance
- Easy field installation with spring loaded clips
- 2-core shielded cable
- Transmission distance \approx 200 meters
