

SF Series Installation Procedure

1) The device with the water-proof pad.

2) Take away the water-proof pad.

3) Open the fingerprint sensor cover.

4) Remove the plastic cover on the device: The left hand holds the device, the right thumb stretches into the fingerprint sensor slot, the right forefinger press the right edge of the device. The right thumb pulls the plastic plate along the vertical direction to the device (the plastic plate is made of PC+ABS materials, with a strong anti-pull ability, will not be easily destroyed).

5) The plastic cover is being removed.

6) Fix the device and the water-proof pad on the wanted place.

7) Fix the plastic cover on the device, and finish the installation.
